

**Priority Access  
Routing Working  
Group Update**

## Working Group Members

Chris Poland – Private Sector Co-chair

Patrick Otellini – City Co-chair

Cynthia Chono (DPW)

Nick Majeski (GSA)

Micah Hilt (ESIP/GSA)

Linda Yeung (Deputy City Administrator)

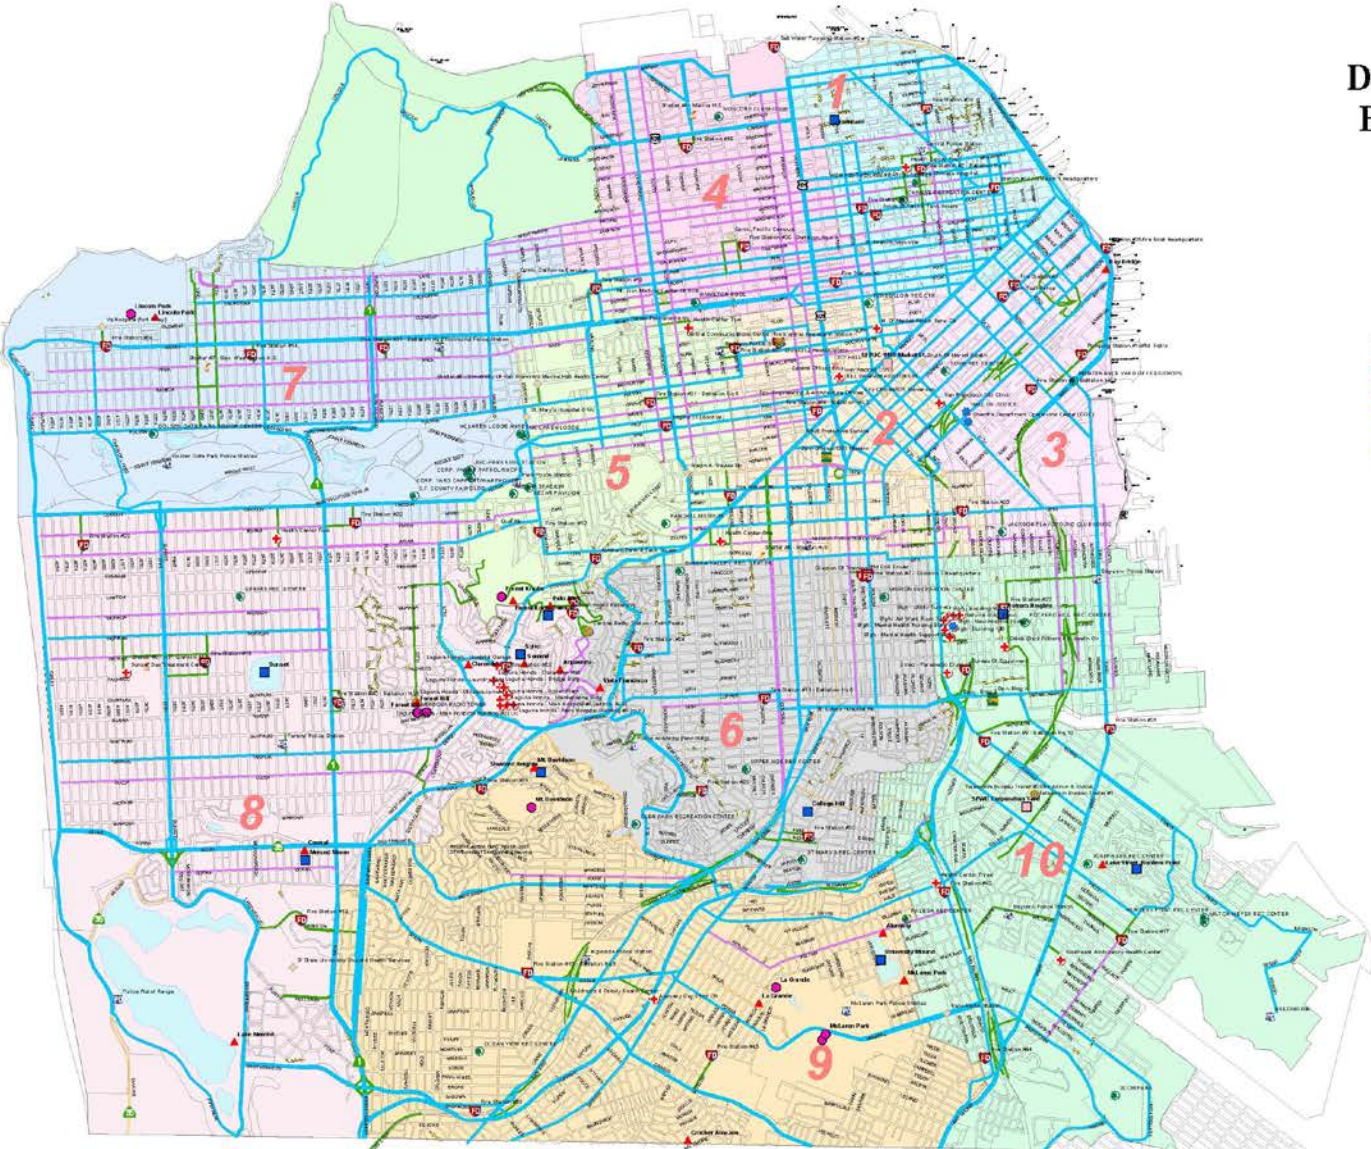

Goal: To better prepare the City of San Francisco for post-event recovery by working with city agencies and private industry utility providers to identify critical locations and access points to better determine, coordinate, and prioritize opening key access routes. This should include the creation a dynamic route setting process that will allow access to critical facilities in a post disaster setting and provide clear criteria for the closure of particular routes or geographic areas.
